

Abhiram Sripada

New Brunswick, NJ | abhisripada1@gmail.com | [linkedin.com](https://www.linkedin.com/in/abhir-sripada) | <https://github.com/Abhir-am>

EDUCATION

Rutgers University

Bachelor of Science in Computer Science

New Brunswick, NJ

Aug. 2025 – May 2028

- Coursework: Data Structures & Algorithms, Linear Algebra, Discrete Mathematics, Computer Architecture, Data Management for Data Science

EXPERIENCE

Rutgers University–New Brunswick

ML Undergraduate Researcher

April 2026 – Present

New Brunswick, NJ

- Developed an augmented reality mobile application for early skin cancer detection by integrating AI-based image classification with real-time camera and AR frameworks
- Designed and implemented software components for computer vision inference, image processing, and real-time diagnostic visualization
- Trained and evaluated deep learning models on dermatological image datasets using statistical metrics including accuracy, precision, recall, F1-score, and ROC-AUC
- Created application wireframes and user interface designs in Figma and implemented frontend in react

IpserLab

Software Engineering Intern

February 2026 – July 2026

Fort Worth, TX

- Developed and implemented software features for AI-driven applications in a collaborative startup environment using Agile software development practices
- Designed and built an automated support ticket classification system using Java, Weka, and Tribuo, reducing ticket processing time by 40%
- Implemented supervised machine learning models in Java using Weka and Tribuo to automatically classify over 5,000 customer support queries, improving classification precision by 22%

Kumon

Math and English Tutor

July 2023 – June 2024

Hillsborough, NJ

- Strengthened communication, analytical thinking, and problem-solving skills by mentoring students and communicating academic progress with parents
- Adapted teaching strategies to diverse learning styles, improving student engagement and comprehension

PROJECTS

NBA Fantasy Points Predictor | *Python, SQLite, scikit-learn, pandas, matplotlib*

- Collected and stored 41,163 game logs across 365 NBA players using the nba_api library and a SQLite database
- Built and compared three predictive models (Baseline, KNN, Random Forest) to predict player fantasy points
- Achieved a baseline MAE of 7.14 fantasy points on the 2023-24 season using a 20% holdout test set
- Engineered features including rolling averages, home/away splits, and opponent defensive ratings

FRC Scouting Counter App | *Java, Android Studio, Git*

- Collaborated with a mobile development team to design and implement an Android app for First Robotics Competition
- Incorporated a responsive UI to enable judges to score robot performance in real time
- Used Git for version control and collaborated with team members on feature development

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, HTML/CSS, SQL, R

Frameworks: React, Flask, FastAPI, Next.js

Developer Tools and Databases: Git, Docker, VS Code, Supabase, Excel, Linux, Figma, Adobe Illustrator, Cursor/Claude Code, Microsoft Office

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow

Concepts: Data Structures and Algorithms, Object Oriented Programming, API development, NLP
